DISCLAIMER: We reserve the right to modify our products and/or related services and/or discontinue the manufacture and/or supply of any of the products and/or related services presented within documentation on products (including this Technical Manual or in any similar technical documentation) without notice. No product is warranted as being fit for a particular purpose and we do not assume any liability in connection with the use of our products other than those technically approved by us for specific products. This document supersedes all previous versions and previously issued documentation.

A GLOBAL REPUTATION

“Manuli Hydraulics is focused on achieving excellence in the design, manufacture, and supply of fluid conveyance solutions, components and associated equipment for high pressure hydraulics, industrial material conveyance, refrigeration and cooling applications.”

From design to manufacture, and assembly, Manuli Hydraulics' continual commitment to this unified philosophy makes us a global leader in providing integrated solutions for fluid and material transfer connector applications including hydraulics, refrigeration & air conditioning, oil & gas, water and industrial low-pressure.

Manuli Hydraulics offer a complete range of hoses, fittings and assembly equipment which are purposely designed to work seamlessly together. This harmonized approach allows us to guarantee the quality and performance of our hose assemblies.

Every metre of hose and every single fitting is backed by industry knowledge and experience, made available to you through our dedicated team of application engineers.

From advice on component selection and configuration, our technical expertise allows us to support and work directly with our customers whenever and wherever they are based.

WHY CHOOSE MANULI HYDRAULICS?

Partnering with Manuli Hydraulics means choosing a global leader. Renowned for our commitment to innovation, quality, and sustainability, we deliver durable, and efficient solutions that enhance the performance, and reliability of hydraulic systems. With a strong global presence and a customer-first approach, Manuli Hydraulics continues to set industry standards.

GLOBAL FOOTPRINT

A vast network of manufacturing plants and robust supply chain network ensures efficiency and accessibility.

FULLY INTEGRATED SOLUTIONS

Fully integrated hoses, fittings, and assembly equipment optimized for superior performance.

UNCOMPROMISING QUALITY

Stringent testing and quality control processes meet and exceed international standards.

RIGOROUS TESTING

Our state-of-the-art facilities conduct extensive testing, including specific hose assembly validation to guarantee durability and reliability.

TECHNICAL KNOW HOW

Our expert team is ready to assist with product selection, application engineering, and troubleshooting. We provide comprehensive training to ensure your team is equipped to succeed.

EXCEPTIONAL CUSTOMER SUPPORT

Manuli is committed to providing 'best in class' service. Our dedicated and responsive customer service teams are focused on creating and maintaining customer satisfaction.

When you choose Manuli Hydraulics, you gain more than just superior products—you gain a partner dedicated to optimizing your hydraulic systems. Experience innovation, reliability, and industry-leading expertise with Manuli Hydraulics.

MANULI ASSEMBLY EQUIPMENT

Manuli Hydraulics has always prided itself on its integrated approach of the design, manufacture, and supply of flexible connector solutions, ensuring that every single hose and fitting is part of a unified approach which guarantees safety, reliability and performance. This unified approach also includes the assembly equipment used to build hose assemblies.

The creation of high-quality, reliable hose assemblies for hydraulics, refrigeration and industrial applications requires more than just simple tools and a basic knowledge of how to put the components together. The Manuli Equipment Unit combines cutting-edge assembly equipment with decades of experience and knowledge of what makes a great hose assembly.

The Manuli Hydraulics Assembly Equipment product range covers every stage of the hose assembly process at all operational scales. So whether you assemble 10 or 10,000 hoses a week, the Manuli Equipment range has an entire range of products suited to your needs.

START TO FINISH ASSEMBLY SOLUTIONS

When you assemble a hose there are several critical points in the process which can determine the success or failure of the assembly in use. Our knowledge and experience of hose assembly processes, combined with our unique level of control over the components, allows us to guarantee the quality and reliability of any genuine Manuli hose assembly to a degree that no other hose manufacturer can.

The Manuli Equipment product range covers all stages of the hose assembly process, providing a “start to finish” portfolio that allows us to supply equipment to any assembler, regardless of operation size, hose type and location.

FIELD SERVICE & MOBILE WORKSHOP 12V/24V

A compact and robust line up to 2", perfect for on-site repair. The hand crimper, MHP 80 EVO, offers accessibility to all sites. A complete 12V line delivers hose assembly quality equal to the one obtained in a workshop.

MPH 80 EVO (Pg.25)

Capacity: 1" 2 WB
Compact
Lightweight
Easy to use
Balanced design
Dual stage pump

MH SKY (Pg.13)

Capacity: 2"
Economic
Simple
Compact
Robust
Plug'n skive system

MV 137 (Pg.36)

Capacity: 1 1/4" 4WS
Robust and compact design
Lightweight
High crimping speed
Suitable also for 90° elbow fittings
Cylinder protection
Remote head mounting option possible

MV 22 CUT (Pg.2)

Capacity: 1 1/4" 4WS
Smooth bending system
90° cut
Clean cut
Scalloped blade
Dust collector included
Multiple voltage options

EXPERT SERVICE LINE

A result of our collaboration with OEM assemblers and hose manufacturers, our expert workshop combines power, reliability, speed, openness and comfort. Manuli Hydraulics is now the most innovative manufacturer in machines dedicated to OEM, providing (for instance) the Safe Crimp System which guarantees a constant control of hose assemblies.

M 90 CUT (Pg.10)

Capacity: 3" 6WS
Very powerful
Heavy duty for difficult cuts
Hydraulic bending
Brake motor
Electronic soft start

M 300 SKY (Pg.15)

Capacity: 3" 6WS
Plug'n skive system
Large dust collector
Robust & easily adjustable knife for quick and easy changeover
Suitable for high volume production
2-way rotation

M 1500 INS (Pg.19)

Capacity: a ll hydraulic hoses from 3/4" up to 2" Interlock
Compact
Sturdy
Powerful
Hydro pneumatic power pack

MS 480 (Pg.42)

Capacity: 3" 6WS
High crimp force
Large opening
Safe Crimp System (SCS) control
Wide family of dies for industrial hoses
Long master dies
Robust
Low noise level
Easy die set-up with ergonomic gun

INDUSTRIAL WORKSHOP

A workshop developed on a complete range of Industrial crimpers combining power, openness, ergonomics and solutions for handling large diameters. This workshop increases your potential of opportunities. It allows you to prospect many and various markets and thus amortize your investment quickly. Our knowledge of the activity constraints led us to offer ergonomic solutions adapted to the handling of large diameters.

MS 800 (Pg.43)

Capacity: 4" 4WS / 3" 6WS / 8" Industrial
Designed for heavy duty large bore hydraulic hoses
High power and speed
Ergonomically designed for large bore hoses
Safe Crimp System (SCS) for maximum reliability during the crimping process
Large opening up to 8"
Long master dies
Very high crimping force

INTRODUCTION

Our dedicated range of hose cutting machines produce a high-quality cut even through the toughest hose structures. With a selection of cutting blade styles available, there's no job that our cutting machines can't cope with.

ACCESSORIES AND TOOLS

CUTTING DISCS

SCALLOPED BLADE TYPE

The scalloped blade is suitable for all hose types. It is able to reach a high quality of cutting surface and is the standard on 254 and 300 mm blades.

SLOTTED BLADE TYPE

The slotted blade is recommended for cutting standard and heavy duty hoses. It is ideal for continuous service, as the blade profile has been optimised to maintain a low temperature on the cutting edge. This blade provides an extended operational life of up to 2 times superior to the previous blade, and is the standard on 400 and 520 mm blades. It is optional on diameter 254 mm.

MOTOR BRAKE

The motor brake is a device which stops the disc immediately when the stop button is pushed.

PNEUMATIC BENDING

Available on M 55 CUT and M 75 CUT.

Pneumatic bending facilitates cutting, as the operator does not have to force the hose on the blade. The pneumatic system, activated by a foot switch, offers hands-free operation. This is the same principle for the hydraulic bending on M 90 CUT.

INTRODUCTION

From manual hand-skiving tools for low volume maintenance, to high volume production machines, our skiving equipment provides a clean, safe hose skive, whatever your hose type (for both internal and external skive).

ACCESSORIES AND TOOLS

EXTERNAL SKIVING TOOLS

Depending on the machine and on customer needs, Manuli offers three types of external skiving tools:

1. ESE (EXTERNAL SKIVING ECONOMIC)

For MH SKY, M 50 SKY + & M 30 CUT & SKIVE

The ESE kit includes 10 mandrels: 1/4", 5/16", 3/8", 1/2", 5/8", 3/4", 1", 1 1/4", 1 1/2", 2"

2. ESA (EXTERNAL SKIVING ADJUSTABLE)

For M 300 SKY

The ESA kit includes 11 mandrels: 3/16", 1/4", 5/16", 3/8", 1/2", 5/8", 3/4", 1", 1 1/4", 1 1/2", 2"

ESA mandrels are also available in 2 1/2" and 3"

3. ESP (EXTERNAL SKIVING PRODUCTION)

For M 50 SKY + and M 300 SKY

ESP tools are individual 'skiving heads' intended to be pre-set to the right depth and length for greater productivity. They are recommended for batch skiving operations and a second knife can be added for abrasion resistant covers.

ESP is available in: 3/16", 1/4", 5/16", 3/8", 1/2", 5/8", 3/4", 1", 1 1/4", 1 1/2", 2", 2 1/2" and 3"

INTERNAL SKIVING TOOLS

IS (INTERNAL SKIVING)

For all machines

The IS kit includes 7 mandrels: 1/2", 5/8", 3/4", 1", 1 1/4", 1 1/2", 2"

They are also available in 5/8", 2 1/2" and 3"

The ring is heat treated to resist the abrasion of the hose wires.

Optional venturi system with IS tool.

ACCESSORIES AND TOOLS

HOSE CLAMPING SYSTEM

Recommended for skiving hoses over 2" (DN 50)

PLUG'N SKIVE SYSTEM

All Manuli Hydraulics skiving machines are equipped with the Plug'n Skive System which allows the quick and easy insertion of tools.

With the Plug'n Skive System no tools are needed to insert the skiving mandrel. Simply push the mandrel into the locking system to unlock it, lift the knob and pull out the tool.

INTRODUCTION

Our insert pushing equipment takes the effort and uncertainty out of building hose assemblies by making sure that fittings are fully inserted prior to crimping.

INTRODUCTION

Ensure full traceability with our ferrule marking equipment, complete with a full set of alpha-numeric and additional character punches.

M 50 MARK

AFTER MARKET SERVICE
BENCHTOP, FERRULE MARKING

KEY FEATURES

- Robust
- Easy to use
- Compact
- Large space for 14 stamps
- Stamp holder with numbering wheel; 3 figures on the wheel + 1 groove for stamps

TECHNICAL SPECIFICATIONS

CAPACITY

2wb: 4" max.

4ws: 4" max.

SIZE OF THE STAMPS

6 x 3 mm

(0.236 x 0.118")

DIMENSIONS

390 x 360 x 520 mm

(15 x 14 x 20")

HEIGHT OF THE LETTERS

2.5 mm

(0.098")

PACKAGING

800 x 600 x 830 mm

(31 x 24 x 33")

TECHNICAL FEATURES

Optional stamp holder with numbering wheel: 3 figures on the wheel and one groove for 10 stamps

NET WEIGHT

34 kg (75 lb)

GROSS WEIGHT

50 kg (110 lb)

STAMP BOX

Includes stamp box of 100 stamps & 20 blanks

STANDARD STAMP HOLDER

2 x 14 stamps

INTRODUCTION

Our crimping machines come in a variety of sizes and capacities, making them ideal for everything from one-off, small bore maintenance jobs to full scale assembly production operations.

CRIMPING MACHINES EVO RANGE

Manuli Hydraulics is always on the lookout for ways to improve both the efficiency and the quality of new and existing production operations.

As a market leader in assembly machines, we wanted to offer new crimping machines to improve the operator's comfort, giving more flexibility when assembling hoses. This led to the creation of the new EVO crimping machines.

These machines combine the robustness required for harsh environments with the reliability needed for busy workshops. Their compact and ergonomic design, along with the ease of set up and maintenance, make them suitable for a variety of applications.

This extensive range is highly adaptable, with various options available allowing users to customise their machine according to their specific needs.

- Extensive range for both industrial and hydraulic hoses.
- 137, 240, 350 and 420 tonnes variants
- From 3/16 up to 4" hose diameter
- 3 kW, 4 kW and 5,5 kW motor for 1 Ph/3Ph

- SC panel - Smart Control panel. Daily counter. Semi-automatic opening.
- SCE panel - electronic micrometer with the ability to save up to 75 configurations
- Caliper connected and numerical display of the crimping range on SCE and SCS
- SCS panel - Safe Crimp System

- Compact and ergonomic design
- Easy set up
- Various options available depending on our customers' needs and workshops

- Robust
- Ease of maintenance (foam pads and dust collector)
- Compatibility with all tensions (different frequencies)

MHP 80 EVO

ACCESSORIES AND TOOLS

SAFE CRIMP (SC) SMART CONTROL PANEL

A basic smart control panel, which includes maintenance functions essential for keeping the machine in good condition.

Maintenance functions include:

- **2 Counters:** 1 daily counter and 1 machine cycle counter
- **3 LED Indicator Lights:** 1 for daily maintenance, 1 for advanced maintenance and 1 for expert maintenance
- **Semi-Automatic Function:** The semi-automatic opening is ideal for serial assemblies as it can be adjusted specifically to allow the fitting to pass through the dies with minimal clearance, saving energy by reducing the cycle time.

SAFE CRIMP ELECTRICAL PANEL (SCE)

A modern touch screen with electronic buttons, which includes maintenance functions essential for keeping the machine in good condition.

Maintenance functions include:

- **Functions of the SC**
- **Electronic micrometer:** with the possibility to save up to 75 hose configurations and automatic die selection. Recording of 35 die-sets
- **Caliper option:** for automatic correction of the crimping diameter

ACCESSORIES AND TOOLS

SAFE CRIMP SYSTEM (SCS)

Benefits of Safe Crimp System (SCS) control for hose assembly activity:

Friendly and easy setting of crimping parameters including:

- › Pre-set of crimp Ø calibration to compensate ferrule elastic rebound
- › Reminder of dies to be used
- › Easy automatic opening setting

Storage of recurrent and customised crimp recipes: favourite crimp assemblies:

- › Short cuts for faster setting
- › No crimp Ø re-adjusting
- › Possibility to download your customised recipes by USB port and save on separate computer (CSV file)

Production counter for batch quantity control:

- › Quality monitoring through automatic crimp control
(Available on certain production and industrial machines)
- › Continuous measurement of crimping pressure with real time display
(Available on certain production and industrial machines / Optional on benchtop machine screens)
- › Countdown of crimps to be performed, monitored according to the preset pressure range
(Available on certain production and industrial machines / Optional on benchtop machine screens)

Operator identification

(Log in / log out)

Maintenance Warnings

INTRODUCTION

Designed to apply proof-pressure testing to assembled hoses, our test benches allow you to test and certify hose assemblies up to 2,000 bar.

DV 32 - OEM DECOILER

DV 32

OEM

Our range of decoilers easily adapts to different types of reels, from cardboard to plastic and wood, supporting up to 100kg. Stable and equipped with a hose guiding system, they guarantee greater safety and efficiency.

Manuli Hydraulics decoilers are also suitable for winding loose hoses.

The DV version is supplied with manual cutting and, thanks to its low centre of gravity, guarantees excellent stability and ease of hose loading.

The OEM version, in addition to the advantages of the DV version, has an even more efficient and precise height adjustment, facilitating the insertion of the tube into the cutting machine. The motorised version is available on request.
